a patient in need thereof a therapeutically effective amount, or a prophylactically effective amount, of the compound according to Claim 1, or a pharmaceutically acceptable salt thereof.

22(Withdrawn) A method of treatment of chronic lower back pain comprising the step of administering to a patient in need thereof a therapeutically effective amount, or a prophylactically effective amount, of the compound according to Claim 1, or a pharmaceutically acceptable salt thereof.

23(Withdrawn) A method of treatment of phantom limb pain comprising the step of administering to a patient in need thereof a therapeutically effective amount, or a prophylactically effective amount, of the compound according to Claim 1, or a pharmaceutically acceptable salt thereof.

24(Withdrawn) A method of treatment of HIV- and HIV treatment-induced neuropathy, chronic pelvic pain, neuroma pain, complex regional pain syndrome, chronic arthritic pain and related neuralgias comprising the step of administering to a patient in need thereof a therapeutically effective amount, or a prophylactically effective amount, of the compound according to Claim 1, or a pharmaceutically acceptable salt thereof.

25(Withdrawn) A method of administering local anesthesia comprising the step of administering to a patient in need thereof a therapeutically effective amount, or a prophylactically effective amount, of the compound according to Claim 1, or a pharmaceutically acceptable salt thereof.

26(Withdrawn) A method of treatment of irritable bowel syndrome and Crohn's disease comprising the step of administering to a patient in need thereof a therapeutically effective amount, or a prophylactically effective amount, of the compound according to Claim 1, or a pharmaceutically acceptable salt thereof.

27(Withdrawn) A method of treatment of epilepsy and partial and generalized tonic seizures comprising the step of administering to a patient in need thereof a therapeutically effective amount, or a prophylactically effective amount, of the compound according to Claim 1, or a pharmaceutically acceptable salt thereof.

28(Withdrawn) A method for neuroprotection under ischaemic conditions caused by stroke or neural trauma comprising the step of administering to a patient in need thereof a
